# Practice Day 2

**Marks : 10**

Create a "Musicians Directory" project where
A musician model will have
      1.     First Name
      2.     Last Name
      3.     Email
      4.     Phone number
      5.     Instrument Type
Album model will have
      1.     Album Name
      2.     One-to-Many Relationships with musician model
      3.     Album release date
      4.     Rating between 1-5

Now you need to use model form so that a logged in user can create a musician and album, edit data, delete data, save data to backend and can see the data in the below format. A non logged in user can only view the table without edit and delete permission.

**N:B : You must solve this problem using class based views**

| ID | Musician Name | Email | Album Rating | Instrument Type | Album Name | Release Date | Actions |
|----|---------------|-------|--------------|-----------------|------------|--------------|---------|
| 1 | Rahim Uddin | rahim@gmail.com | 5 | Guitar | Preyotoma | 06-Dec-2023 | Edit  Delete |
|  |  |  |  |  |  |  |  |

Instructions :
1. While clicking edit button anyone can edit the album data
2. While clicking name of the musician anyone can edit musician data
